

SCHÜTZ SC1 PE JERRYCANS

Comprehensive expertise.

The name SCHÜTZ stands for innovative, high-quality plastic packaging. With our global network of production plants designed and built by our company, we reliably supply millions of IBCs and drums every year to customers in a wide range of industries all over the world. Our latest product line is based on this broad and mature expertise.

NEW

**SC1 JERRYCANS
BY SCHÜTZ**

5 litres

10 litres

The new SC1 jerrycan series expands our product portfolio to include storage and transport solutions for small filling quantities. The different sizes are available in a choice of configurations and colour variants and, like all SCHÜTZ packaging, offer maximum quality and user-friendliness, safe handling, secure stacking and excellent residual emptying.

25 litres

30 litres

Top quality.

Our new jerrycans combine SCHÜTZ's unique expertise in extrusion blow moulding with smart packaging design. The result is a product that offers superior overall performance.

State-of-the-art 3-layer technology

SCHÜTZ SC1 jerrycans are manufactured using the latest, fully electric generation of equipment, ensuring a production process with maximum efficiency, quality and cleanliness. Our outstanding technical expertise in multi-layer extrusion makes optimum use of the material and guarantees jerrycans with uniformly thick walls.

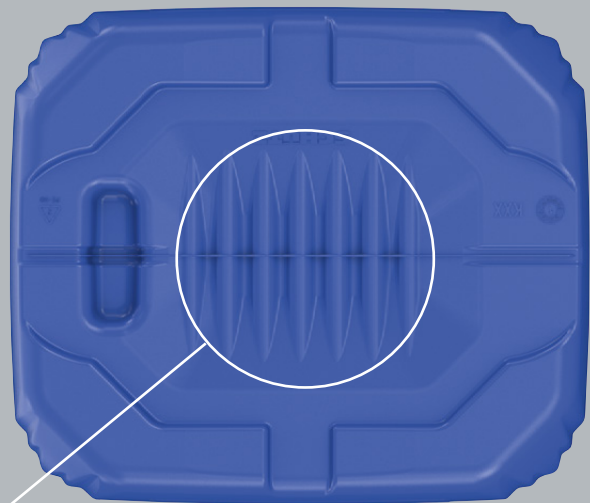

Certified safety including UN approval

The SCHÜTZ production system is certified according to international standards and complies with the highest requirements in safety, health protection, environmental and quality management.

SCHÜTZ SC1 jerrycans have hazardous goods approval from the renowned German Federal Institute for Materials Research and Testing (BAM) and are subject to permanent quality testing and control during production, backed by regular practical and laboratory tests in our own test laboratories.

Outstanding dimensional stability

The distinctive rib geometry of the jerrycan corners and base significantly increases the dimensional stability and crush resistance when the jerrycans are filled and stacked.

Optimum handling.

Benefit from the
highest ease of use
and process support
in your application.

Easy to use

The anatomically shaped handle with a large hand recess and small recess for the handle in the base ensures comfortable and safe handling when carrying and emptying – even when wearing gloves.

Clean and hygienic

The hand recess and recesses around the closure area are sloped so that liquids can drain away instead of accumulating.

Ideal residual emptying

The corners around the cap are flattened to avoid product residue from accumulating, ensuring that the jerrycan can be completely emptied.

Secure stacking

The stacking ring on the top of the jerrycan fits perfectly into the geometry of the base. The interlocking bond provides excellent hold and protection against slipping.

Large area for labelling

The two flat surfaces on the jerrycan sides provide plenty of space for labels and lettering.

Wide range of options.

Pick the SC1 jerrycan that matches
your exact requirements!

WE WILL BE HAPPY TO ADVISE YOU!

Jerrycan colours

All SCHÜTZ jerrycans are available in
three standard colours.

Filling gauge

Depending on the selected jerrycan
colour and your filling product, we
can supply an embossed litre gauge,
with an additional transparent gauge
as required.

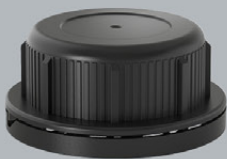

Optional: SMP anti-permeation layer

The inside and outside of the jerrycan are treated with a special fluorination process to provide a highly efficient permeation barrier layer:

- The benefits include increased solvent resistance, perfect transport security and an extended shelf life of the packaged product
- Reduced substance loss through low permeation rates
- Highly effective odour and flavour barrier

Caps – examples

Thread	Jerrycan	Options	
DN 45	5l, 10l, 15l	Tamper shield with vent UN/Non-UN	
DN 55 (DN 51)	5l, 10l, 15l	Tamper shield with vent UN/Non-UN	
DN 60	20l, 25l, 30l	Tamper shield with vent UN/Non-UN	

Sensitive applications.

Jerrycans for safe use with food products and for the highest cleanliness requirements.

SCHÜTZ FOODCERT

Our premium standard for maximum food safety in terms of material, manufacturing process, and end product offers:

- System certification according to FSSC 22000
- Full conformity with international food regulations
- Traceability down to batch and process level
- Halal and kosher certification
- Regular microbiological tests
- Individual packaging and storage under cover

SCHÜTZ CLEANCERT

CLEANCERT offers maximum technical cleanliness for quality-critical applications. Ideal for cosmetics, pharmaceuticals, paints/coatings and the semiconductor industry:

- Material and process cleanliness at the highest level
- Comprehensive, HACCP-compliant risk management
- All components that come into contact with the filling products are made of silicone-free materials
- Storage and shipping under controlled conditions

Resource-efficient packaging solutions.

In the optional SCHÜTZ GREEN LAYER version, the middle layer is made from high-quality recycled material – without compromising on quality or performance.

Discover the benefits of the combination of maximum safety, low operating weight, and a recycle content of 30 %:

- The HDPE recovered by SCHÜTZ in extensive recycling processes is used exclusively in the middle layer of our modern, three-layer SC1 jerrycans.
- The inner layer, which comes into direct contact with the contents, and the outer layer are both made of new material.
- This means that the filling product and the environment only come into direct contact with new material.
- The GREEN LAYER version is also available with UN certification.
