

ECOBULK RECONDITIONING & ORIGINALITY

Uncompromising quality for unconditional safety.

Within the scheme of SCHÜTZ TICKET SERVICE – the most convenient system for collection and reconditioning of used ECOBULK containers – SCHÜTZ guarantees OEM quality and full product safety of the reconditioned IBCs:

- Solely use of original SCHÜTZ spare parts for exchanging components
- Application only of reco-procedures that are tested, proven and sustainable
- Reconditioned IBCs with interaction of the different components are thoroughly proved and tested
- New certification according to UN guidelines on the transport of liquid goods

UN-approval for the transport of hazardous liquids, as applied for by SCHÜTZ for SCHÜTZ ECOBULK IBC and issued, may become void, if parts are replaced by nonconform parts.

Original spare parts

Watch for it for full product safety of reconditioned ECOBULK containers:

SCHÜTZ marks all original components with its corporate logo

All components are designed and built with the intention of maximising the performance of the whole system

All parts are produced and assembled in approved processes based on the entire SCHÜTZ know-how

SCHÜTZ marks each steel cage with its production location and date.
