

FOR SCHÜTZ IBCs

SCHÜTZ AUTOMATIC LOCK

Seal cap system with
originality protection.

Protect your filling products against unnoticed discharge or contamination:

- Seal cap system with originality protection, consisting of:
 - seal cap
 - corresponding plug with special latching hooks
- Tamper proof – it is impossible to open the plug without destroying the seal cap

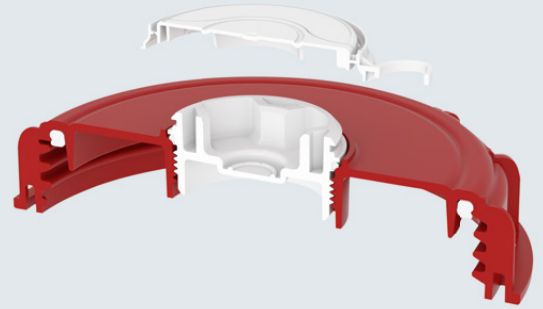

In case of technical concerns or questions: tcs@schuetz.net

Manual or automatic fitting

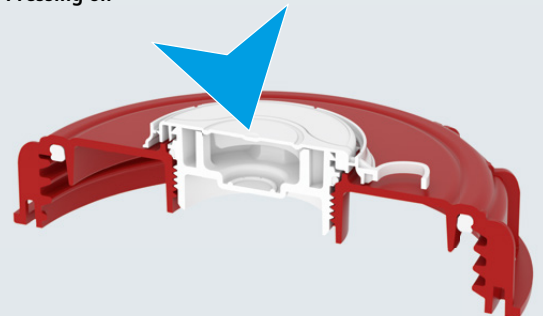

1. Place the seal cap on top of the plug

2. The seal cap centres itself automatically

3. Pressing on

Light pressure on the positioned seal cap makes the locking ring snap into place behind the latching hooks.
