

PE DRUM

F1 & S-DS1

INSIDE LAYER NATURAL

Drums with an inner layer made of natural, high quality IBC inner bottle material.

- Technically the best solution for PE drums through the SCHÜTZ Security-Layer Technology
- Excellent material compatibility through the natural HDPE on the inside of the drums
- No colour pigments on the inside, therefore the highest purity and best protection of filling product quality
- Further enhanced resistance to stress cracking
- More flexibility in the choice of packaging – Products filled into IBCs can in most cases simply be transferred to drums
