regranulate
New material

SCHÜTZ PE drums with GREEN LAYER combine high quality and safety with active conservation of resources and CO₂ savings thanks to the use of recycled materials.

- In the new optional version GREEN LAYER the middle layer is made of high-quality SCHÜTZ regranulate
- Quality and origin of the regranulate confirmed by independent certifiers
- The inner layer, which comes into direct contact with the contents, and the outer layer are both made of new material
- The filling good and the environment therefore only come into direct contact with new material
