

PE DRUM

OC & F1

High-performance open and tight-head drums.

AUSTRALIA ONLY

- These drums provide a solution for a myriad of filling goods, with the OC drums for pastes, pellets, granular material and powders whilst the F1 drum is used for liquids
- Technically the best solution for PE drums using the SCHÜTZ Security Layer Technology
- Excellent material compatibility featuring natural HDPE on the inside of the drums
- No colour pigments on the inside, therefore the highest purity and best filling product protection
- With optional FDA certification suitable for the transport of food products and other similar filling products

In case of technical concerns or questions please email: tcs@schuetz.net
