IMPELLER SYSTEM

The IMPELLER System eliminates the need for complex external stirring systems:

- Closed loop system
- Enhanced safety and cleanliness through a brand-new stirrer in each IBC
- Minimises the risk of filling good contamination
- No contamination hazard caused by residues on the stirrer through the elimination of multiple use
- Uncomplicated, fast handling thanks to an easy-to-attach drive

Please do not hesitate to contact us regarding any technical concerns or questions. The SCHÜTZ IMPELLER System is currently under development.
